## tech-docs.roompact.com

The screenshot shows a web browser window with the following content:

- Browser tab: Technical Documentation | Roompact
- Address bar: tech-docs.roompact.com
- Page title: Technical Documentation
- Roompact logo
- Section header: Roompact Technical Implementation
- Text: Roompact's Technical Implementation consists of 4 elements:
- List of elements:
  - Campus Structure Import
  - Resident Assignment Import
  - Single Sign-On
  - Resident Photo Upload
- Text: The Campus Structure Import is typically a one-time process and must be completed before the Resident Assignment Import. However, Single Sign-On is independent and may happen at any time. Sometimes, the Campus Structure Import and Resident Assignment Import process may be completed by a vendor.
- Text: If resident assignment data and resident photo data are held in different systems, we recommend first focusing on the Campus Structure Import, Resident Assignment Import, and Single Sign-On processes, then moving on to the Resident Photo Upload.
- Text: Roompact's implementation team uses a shared inbox at implementation@roompact.com. Please reach out with any questions.
- Section header: Data Export
- Text: Roompact provides the ability to **export** data from our system via an outbound JSON API. This API is unrelated to our technical implementation and is not required for

# SSO Connection

**Warning:** Resident assignments are being imported through an automated data feed. Manual changes made to existing users with this tool may be overwritten. To change resident information, make sure it is accurate in your housing management system or system of record. This should automatically update the resident information in Roompact's software within 24 hours. If you think there is an error with these automatic updates, contact us at [support@roompact.com](mailto:support@roompact.com).
